Work Experience

07/17 – 09/17   **Front-End Web Developer Intern,** Ogilvy One Worldwide | Bangkok, Thailand

- Wrote an API in PHP & Javascript to fetch survey reports provided by 19000+ NIVEA consumers
- Transformed Photoshop templates (provided by the clients and Design Team) into fully-interactive, responsive front-end webpage
- Created modern, attractive-looking email templates for Samsung using Foundation library
- Conducted numerous unit testing and composed more than 5+ functional specifics documentations
- Clients worked with: Nivea, Show DC shopping mall, Milo beverage, Samsung Asia

01/17 – 03/17   **Android Application Developer Intern,** Bitsee (Start-up Company) | Seattle, Washington USA

- Solely developed an interactive welcome screen and a Tutorial section for first-time users
- Developed a one-page theme for company's website, incorporating frameworks like HTML5 Boilerplate, Bootstrap, and implementing CSS techniques like Flex and Grid layout
- Wrote testing scripts to ensure app's stability and organized the logistics of finding and receiving feedback from volunteer
- Designed and enhanced tutorial and existing interfaces, earning positive reviews from co-founders

07/16 – 09/16   **Android Application / Web Developer Intern,** CP All Plc. | Bangkok, Thailand

- Solely developed an Employee Satisfaction application used internally in more than 9000+ 7-Eleven convenience stores
- Written PHP scripts and SQL queries to fetch and organize satisfaction results users submitted from the mobile app
- Helped upgraded company's existing web development platform to today's standards, like by utilizing Webpack, NPM, and Gulp
- Built a simple back-end dashboard for Managers and CEO to view satisfaction results

Projects

- **"Daily Notes – Distraction-Free" Mobile Application** | App Store – Allowed the user to collect notes in a much faster and intuitive way than other types of note-taking apps on the market
- **Institute of Electrical and Electronics Engineer (IEEE) Website** | students.washington.edu/hknieee – Led a team of web developers to revamp and improve the previous website, increasing visitor traffic and ultimately numbers of members
- **Command-Line-Interface App for Fetching Soccer Scores** | github.com/naruthk – Built with Python; Allowed retrieval of soccer's fixtures, table standings, and players' information
